SJE® Acquires AMI Global, Expanding Industrial Internet of Things (IIoT) Capabilities

SJE focuses on building a digital-first environment to support technology growth

DETROIT LAKES, Minnesota (September 22, 2025) SJE, Inc., the global industry leader in control systems, today announced the acquisition of AMI Global from Cimbria Capital. With the combined capabilities, SJE expects to accelerate the delivery of advanced cloud connected opportunities and offer its customers a comprehensive platform of remote monitoring solutions. The AMI global acquisition represents SJE's sixth since 2021 and first in 2025.

AMI Global is a leading IIoT technology company providing end-to-end remote connectivity solutions for industrial equipment with a deep expertise in the broader pump application and water wastewater markets.

Founded in 2009, AMI Global has grown into a trusted expert in delivering simple, cost-effective, and scalable cloud solutions for industrial equipment manufacturers.

"AMI Global has a knowledgeable and experienced team in all facets of IIoT, which will enable us to continue to make great progress in today's digital-first environment and improve our approach to incorporating technology into our offerings," said Bjorn Haldorsen, CEO of SJE. "Together, SJE will continue to grow and strengthen our core business while providing our customers with more dynamic technological solutions."

AMI's CEO, Henrik Laursen sees similar strengths and benefits for the AMI customers' experience through SJE's products and services. Laursen said, "The AMI Global team is excited to partner with SJE and believes this will enhance SJE and AMI customers with a streamlined suite of remote monitoring products and IIoT solutions."

As part of the acquisition, SJE has established a new Cloud Connected Solutions division, which will be led by Henrik Laursen. The new division will enable SJE and AMI customers to experience the same support while continuing to diversify our company portfolio and broaden our capabilities in key markets. AMI Global will be further strengthened by SJE's technical expertise and in-house manufacturing capabilities.

About SJE Inc.

SJE® was founded in 1975. Over 50 years later, SJE has evolved into a global industry leader in control systems, operating throughout the United States and Canada, as well as in international markets. SJE, a privately held company, is comprised of over nine well-respected brands known for their innovation and quality. SJE has locations throughout the United States, Mexico, and Asia. SJE offers a wide variety of control products for residential, commercial, municipal, water, wastewater, and industrial markets, representing the most reliable integration of engineering and manufacturing capabilities in the industry.
